SERGEI GRIGOREV

Boden, Sweden | +46 732302675 | sergeigrigorev.net@gmail.com | sergeigrigorev.com

Early-career **game programmer / technical designer** experienced in developing games using Unity and Unreal Engine. Currently working as a programming mentor at Futuregames and developing games at my own indie studio, The Notlanders.

EXPERIENCE

Futuregames – Programming Mentor
Jan 2026 – Present (Boden, Sweden)

- Mentored 51 game programming students across two different sites (Boden and Warsaw).
- Provided support and feedback on assignments and game projects, graded assignments.
- Communicated student progress, risks, and feedback to teaching and administrative staff.

The Notlanders – Indie Developer / Co-Founder
Jan 2024 – Present (Boden, Sweden)

- Worked as sole programmer & co-designer on a commercial Unity title for 2 years.
- Developed gameplay systems, UI and editor tools in C#; authored a 16k+ LOC codebase.
- Helped design core gameplay, NPCs, quests, environments and UI elements.
- Built custom stylized shaders in HLSL, helping define the game's art style.
- Coordinated QA and localization efforts prior to the launch of Fail Fail Succeed.
- Supported the pre-launch marketing campaign for Fail Fail Succeed.

Envar Studio – AI Programmer (Internship)
Nov 2022 – Jan 2023 (Stockholm, Sweden)

- Contributed to a vertical slice in-house demo of Witchspire, built with Unreal Engine 5.
- Implemented combat AI for melee, ranged and boss enemies using behavior trees.
- Designed unique behaviors and attack patterns for different enemy archetypes.

EDUCATION

Futuregames – Game Programming (Higher Vocational Education Diploma)
Sep 2023 – Dec 2025 (Boden, Sweden)

- Graduation Project: Real-time hardware accelerated ray tracer with Vulkan.

Uppsala University – Game Design and Programming (Bachelor's Degree)
Sep 2020 – Jun 2023 (Visby, Sweden)

- Bachelor’s Thesis: Finding the fun in non-verbal tabletop games.

SKILLS

- **Programming Languages:** proficient in C#, C++14, UE Blueprints.
- **Paradigms:** proficient in OOP, familiar with TDD and data-oriented design.
- **Game Engines:** proficient in Unity and Unreal Engine 5.
- **Version Control:** experience with Git + GitHub, Perforce, Unity DevOps.
- **Project Management:** experience with Agile (SCRUM, Kanban, and hybrids).
- **Languages:** fluent in English, native Russian speaker, beginner Swedish.

EXTRA

- Administered and moderated modded Minecraft servers for about 3 years.
- Organized a university tea club to foster social connection after the pandemic.
